

# CIPS Sustainability Index Rated Supplier

The CIPS Sustainability Index (CSI) is a collaboration between the Chartered Institute of Procurement and Supply, the University of West England (UWE) and PRGX. With research indicating that there were limited cross-industry standards to assess all three pillars of sustainability for both suppliers and buyers, the CIPS Sustainability Index was developed by the team to create a consistent sustainability measurement to support purchasing and, in doing so, create significant time and cost efficiencies.

To become a Sustainability Index Rated Supplier, STARLAB UK has been through a rigorous, independent online audit endorsed by the Chartered Institute of Purchasing and Supply. **STARLAB UK's CIPS rating allows our customers to achieve their own sustainable purchasing objectives.**

Not only did STARLAB UK score 100% for environmental management, we scored very favourably in the other two areas audited too:

**ECONOMIC 89%**  
**ENVIRONMENTAL 100%**  
**SOCIAL 94%**

STARLAB UK is proud to be rated as a top performing organisation; this is not only for our size and industry sector, our rating is over and above the average score for all CSI Suppliers!

Supplier Metrics	ECONOMIC	ENVIRONMENTAL	SOCIAL
<b>STARLAB UK LTD</b>	<b>89</b>	<b>100</b>	<b>94</b>
Same size	72	73	81
Same sector	79	71	84
Same size and sector	84	77	82
All CSI Suppliers	82	73	72

Benchmarking as on 22/5/2018

STARLAB UK will continue to regularly review our strategies and processes in all areas of the business, to ensure we continue to implement and maintain good sustainable business practices.
